

Quick Start

REALIZE IMMEDIATE VALUE WITH CONFORMIQ QUICK START

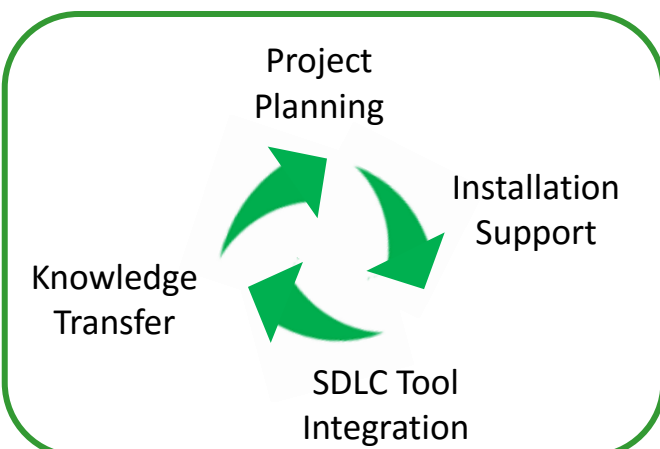

How can you accelerate your productivity with Conformiq 360° Test Automation™ and derive the most value for your testing organization quickly?

The Conformiq Quick Start is all about time to value. Conformiq expert consultants help you come up to speed rapidly with the next-generation Conformiq 360° Test Automation to obtain immediate productivity for your testing team. The Quick Start Package includes all the software (2 licenses), installation, training, documentation, and support needed to:

- Demonstrate the value of Conformiq 360° Test Automation in your environment, including Conformiq Creator™ and Conformiq Transformer™
- Apply Conformiq technology to your SDLC framework
- Automate execution of your existing test cases
- Gain all the knowledge and experience you will need for full deployment

Complete Solution for Your Pilot Project

The Quick Start Package is a support service, delivered virtually, that includes all the software, planning, installation, SDLC tool integration, training and support you need for your Conformiq 360° Test Automation pilot project. You can purchase it standalone or together with a longer term license.

Project Planning

Conformiq experts work as part of your team to create a comprehensive project plan for your pilot including:

- Requirements documentation
- Key Performance Indicators (KPIs)
- Test case documentation, scripts, and reports
- Project recommendations and the roadmap/schedule to deploy

Installation Support

We provide designated contacts on your team with all of the help needed to have your Conformiq 360° Test Automation environment deployed quickly including:

- Joint review of the current testing infrastructure
- Software deployment & validation
- Training on the new test environment

SDLC Tool Integration

The Quick Start Package includes integration with a subset of your SDLC tools: benefit from the transformational Conformiq approach.

Support is also included for existing frameworks that reuse your existing test assets e.g. importing Visio models and HP UFT record and playback scenarios.

Knowledge Transfer

World-class experts bring you up to speed and ensure success with your pilot project through:

- Interactive web based training on Conformiq Creator, Conformiq Transformer, and integrations
- Installation and roll-out support
- Model reviews for your own real-world projects
- Assistance in modeling, managing, automating, and optimizing test cases
- Specialized integration advice
- Project reviews including kick off, progress reports, and summary results

CONFORMIQ QUICK START VALUE

- ✓ All the software, training, expert consultants, and knowledge transfer required for your 60 day pilot project
- ✓ Fast deployment, providing immediate value from the Conformiq 360° Test Automation implementation
- ✓ Next-generation technology plus expertise applied to your specific SDLC testing framework
- ✓ Low pricing, so any organization can get started with Conformiq — even if you have not dedicated a budget

Accelerate your path to next-generation Conformiq 360° Test Automation

Up to 20X faster than manual test design, with an ROI of up to 400%
